

Color Fusion: Mix Primary Colors to Create Secondary Colors and Connect Shapes to Create Forms

Color fusion is the process of mixing two or more colors to create a new color. When you mix primary colors, you create secondary colors. When you mix secondary colors, you create tertiary colors. And so on.

The primary colors are red, yellow, and blue. These colors cannot be created by mixing other colors.

The secondary colors are green, orange, and purple. These colors are created by mixing two primary colors. For example, green is created by mixing yellow and blue. Orange is created by mixing red and yellow. Purple is created by mixing red and blue.

The tertiary colors are created by mixing a primary color with a secondary color. For example, yellow-green is created by mixing yellow and green. Red-orange is created by mixing red and orange. Blue-violet is created by mixing blue and violet.

You can continue to mix colors to create an infinite number of new colors. The possibilities are endless!

Connect Shapes to Create Forms

Once you have created a color palette, you can start connecting shapes to create forms. Shapes can be simple or complex, and they can be connected in a variety of ways.

When you connect shapes, you can create a variety of different forms. For example, you can create squares, rectangles, triangles, circles, and ovals. You can also create more complex forms, such as stars, hearts, and flowers.

The possibilities are endless! Once you start experimenting with different shapes and colors, you will be amazed at the things you can create.

Color fusion and shape connection are two powerful tools that can be used to create beautiful works of art. By understanding the basics of color theory

and shape composition, you can create stunning pieces that will impress your friends and family.

So what are you waiting for? Start experimenting today!
